Colligative properties
Colligative properties
properties are the properties of
solutions that depend on the
TOTAL concentration of solute
particles in solution. The list of
colligative properties includes: a)
lowering vapor pressure above a
solution; b) freezing temperature
depression; c) boiling temperature
elevation; d) osmotic pressure.

Chapter 13: Physical Properties
of Solutions - Part V. Properties
of solutions: Freezing point
depression Salt water looks like
pure water. Tasting the solution is
one way to determine if the water
is a pure substance or a mixture.
Another way to test if a liquid is a
pure substance or a mixture is to
study an intrinsic property of the
liquid. Sat, 14 Apr 2018 03:02:00

Experiment 1: Colligative
Properties - Laboratory 12:
Properties of Solutions
Introduction
Solutions are an
important class of materials we
encounter daily. This
experiment will probe the
physical properties of solutions.
Discussion A complete discussion
of solutions can be found in Hein
Chapter 14, and review of the
properties of mixtures can be
found in Hein Chapter 3. Sun, 15
